

Sustainability Policy

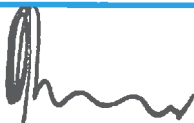

The Caterleisure Group Environmental and Sustainability Policy sets out its commitment to the principles of sustainable development.

As part of this commitment Caterleisure aims to manage its purchasing activities in an environmentally responsible and sustainable manner.

To achieve this Caterleisure will;

- Make procurement decisions based on a balance between economic, social and environmental factors.
- Provide guidance and training to encourage staff involved in purchasing to adopt more sustainable purchasing practices to reduce costs and the environmental impact of goods and services.
- Specify, wherever possible and reasonably practical the use of environmentally friendly materials and products.
- Comply with all relevant procurement and environmental legislation.
- Encourage suppliers to operate better production processes, supply more environmentally friendly products and help spread improvements throughout the supply chain.
- Encourage purchasing staff to review the consumption of goods and material and adopt best practice (reduce, re-use and recycle), in their buying decisions to help minimise environmental impact.
- Communicate this policy to our staff so they are aware of the impact they have on the environment and help them to minimise this impact.
